

**Current Configuration: Is there a dedicated/mounted server storage or network connected file storage for filesystems or file sharing? If so, what are the file system sizes in GB?**

Just a local RAID10 configuration with 716GB

**Desired Configuration: Will the EBS servers be on-premise or cloud? Please explain configuration and sizing in more detail.**

We will have two on prem machines. Production and TEST/Development. The current system will be replaced as the memory on Production is only 16GB.

**Desired Configuration: Will the Apps Tier and Database tiers co-located?**

No – currently Apps and Database Tiers are on the same machines, on prem.

**Desired Configuration: Will there be a dedicated/mounted server storage or network connected file storage for filesystems or file sharing? If so, what are the sizes in GB?**

No plans for shared storage

**Desired Configuration: Linux 8 Upgrade will be upgraded by AIDT – this upgrade must be worked into the EBS upgrade planning due to Oracle certifications/compatibilities, timing is important.**

Acknowledged, our understanding is that Oracle Enterprise Linux version 8 is the supported version.

**OATC Question: Is AME, Oracle Approvals Management Engine in use at AIDT? Yes**

**OATC Question: Configuring OAuth 2.0 Support for Workflow Notification Mailer – who is responsible?**

**AIDT can make any changes in Office 365 to support Workflow Notification.** The vendor should assist with any Oracle Changes needed from our Current IMAP/SMTP Workflow Notification Mailer setup.

**OATC Question: How is time captured? KRONOS? Everyone is paid without timecards being submitted? Please explain.**

Timecards are not submitted in Oracle.

**OATC Question: will this be upgraded to Splash BI?**

Yes.

**OATC Question: is there a desire for 12 weeks total support? If our CRP Method is used, we believe 6 total weeks should be sufficient.**

If it can be done in 6 weeks

**OATC Question: Technical – will new hardware be purchased for this upgrade project?**

Yes. We will attempt to keep the same processor counts while adding much more RAM and storage.

**OATC Question, can more detail be provided? AIDT has a customized leave and accrual plan AIDT (just custom formulas, which is common, or some sort of bolt on customization?)**

formulas

**OATC Question, can more detail be provided? AIDT has a customized Retirement file**

AIDT participates as a TRS entity within Alabama's Retirement System. We are required to produce a data file for them.

See the specifications in the linked PDF.
